<b>Office Action Summary</b>	<b>Application No.</b> 10/582,880	<b>Applicant(s)</b> FUKUDA ET AL.	
	<b>Examiner</b> Lisa N. Klaus	<b>Art Unit</b> 2832	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

1. The disclosure is objected to because of the following informalities:

On pages 3 and 4 are improper and should be removed or rephrased because they call reference to specific claims. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. The term "can be" in claim "1" is a relative term which renders the claim indefinite. The term "can be" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kaestner (US 4,059,952).

Kaestner discloses a bio-rhythm calculator comprising:

- a dial component 24, 26 and 28 that is rotated;
- the first gear 232 that is fitted at the outside of the dial component 24 to rotate together with the dial component 24 and includes a predetermined number of teeth (see col. 5, lines 45-52) formed at an external circumferential side surface thereof;
- a second gear 292 that includes a predetermined number of teeth formed therein and drives a driven member connected thereto;
- wherein said switch mechanism includes a dial switch mechanism structure 260 in which the rotation of said dial component 24, 26 and 28 is transmitted from said first gear 232 to said second gear 292 via a relay component 288.

***Allowable Subject Matter***

7. Claims 2 and 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

8. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest the switch mechanism comprising the dial member assumes a tubular shape with open ends on the two sides thereof; and the push-button switch mechanism that includes at least a sliding component slidably housed along the axis of the dial component and having a push portion located at the bottom thereof and a substrate having a switch portion to contact the push portion is fitted inside the dial component.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
